Professional Summary

PHP Laravel Developer with 3+ years of experience in building scalable web applications, including CRM, Auction, and Lead Management systems, and delivering 5+ live production applications. Proficient in RESTful API development, Laravel Sanctum authentication, Firebase integration, real-time features, and database optimization. Skilled in leveraging AI tools like ChatGPT, Claude AI, and Cursor IDE, along with Prompt Engineering expertise, to accelerate development and deliver high-quality solutions.

Technical Skills

Languages	PHP, JavaScript, Python
Front-end	HTML, CSS, Bootstrap, jQuery, AJAX
Frameworks	Laravel 10–11, Eloquent ORM
Backend	RESTful APIs, Laravel Sanctum, Laravel Passport, RBAC, Queue System, Laravel Jobs, Laravel Events & Listeners, Cron Jobs, Middleware, Policies, API Security, Caching, Spatie Permission
Architecture	MVC Pattern, OOP, SOLID Principles, Repository Pattern, Service Layer Pattern
CS Fundamentals	Data Structures, Algorithms, Problem Solving, Time & Space Complexity
Python	Python Scripting, ETL Pipelines, Web Scraping, Pandas, NumPy, BeautifulSoup, Selenium
Database	MySQL, PostgreSQL, Query Optimization, Indexing, Database Design, Eager Loading, N+1 Optimization
Real-time	Firebase, OneSignal API, Laravel Broadcasting
DevOps & Cloud	Docker, Redis, AWS, Azure, CI/CD Pipelines
Testing	Unit Testing, Integration Testing
Tools	Git, GitHub, Postman, Composer
AI Tools	ChatGPT, Cursor IDE, GitHub Copilot, Claude AI
AI Skills	Prompt Engineering, AI-assisted Debugging, AI-powered Code Review

Professional Experience

PHP Laravel Developer , Kode Creators Pvt. Ltd – Vadodara, Gujarat	May 2026 – Present
- Onboarded onto an existing production-based project, performing in-depth code review, resolving production bugs, and implementing feature changes as per business requirements. - Analyzed and optimized existing RESTful APIs to improve response time and reduce redundant queries; worked on a Pharmacy Management module covering feature development and bug fixes.	
Software Developer (Full Stack) , Luxury Cars Pvt. Ltd – Ahmedabad, Gujarat	Jul 2024 – Apr 2026
- Built and maintained a scalable CRM system managing the complete lead-to-auction lifecycle, including campaign integrations, telecaller workflows, evaluation tracking, auction scheduling, and deal management. - Designed secure RESTful APIs with role-based access control and multi-stage workflow management for car inspection and evaluation modules. - Developed auction platform backend using Laravel Sanctum authentication, KYC approval workflows, dealer access control, and advanced listing filters. - Implemented real-time bid synchronization using Firebase and optimized database queries to improve performance and response time. - Designed queue-based notification architecture using Laravel Jobs and OneSignal API to handle 1000+ push notifications daily efficiently. - Automated auction lifecycle management including QC verification, scheduled transitions, price configuration, and reporting dashboards. - Led backend production deployments, performance monitoring, and enforced security best practices including validation, access control, and query optimization. - Leveraged ChatGPT and AI tools through Prompt Engineering techniques to streamline query optimization, accelerate debugging workflows, and automate API documentation generation. - Engineered a Python ETL pipeline to process large-scale records from unstructured ZIP archives with nested multi-format files using pandas, zipfile, and os; automated data extraction, applied requirement-driven cleaning and transformation, and exported structured outputs to CSV and database. - Automated web data extraction using Python (BeautifulSoup, Requests, Selenium); parsed and structured scraped data for	

seamless integration into internal CRM and database.

PHP Laravel Developer, Sapphire Software Solutions – Ahmedabad, Gujarat Oct 2023 – Jun 2024

- Developed a Lead Management System from scratch with role-based access control using Spatie Permission (Super Admin, Manager, Telecaller).
- Implemented automated equal lead distribution among telecallers with dynamic status and remark tracking, managing 500+ leads efficiently.
- Built Super Admin dashboard with performance analytics (daily calls, appointments, earnings) and date-wise filtering using charts.
- Optimized database performance by resolving N+1 query issues, implementing eager loading, and building server-side DataTables with AJAX, reducing load time by 35%.
- Implemented automated duplicate lead detection using scheduled Cron Jobs, improving data consistency and operational accuracy.
- Resolved 20+ production-level bugs and implemented new feature enhancements across multiple projects, improving system stability and user experience.

PHP Developer Intern, Elsner Technologies Pvt. Ltd – Ahmedabad, Gujarat Jan 2023 – Aug 2023

- Completed Core & Advanced PHP training with hands-on practice projects, implementing multiple features independently.
- Built 5+ dynamic web modules using AJAX, jQuery, and Bootstrap for enhanced user interactivity.
- Contributed to a live Pimcore CMS project, working on real-world content management system features in a production environment.

Education

Gujarat Technological University Aug 2019 – May 2023

- *Bachelor of Technology in Computer Science Engineering*

Achievements & Certifications

-
- Recognized at company townhall for exceptional leadership and delivering project results ahead of schedule.
 - Completed Laravel Web Development certification – Udemy
 - Completed PHP and MySQL certification – Coursera
 - Completed Database with SQL – Oracle Certification
